

QHSE Policy

WindandWater ApS is a highly-specialized company, providing high level Marine Coordination for offshore wind farms. We plan and execute our work for the client in the facilities they provide and in our Svendborg office with due diligence for the surrounding environment and provide a safe working environment for our consultants.

We work actively with prevention of pollution and have an ongoing dialog with our clients regarding QHSE issues. We abide current QHHS law and regulations and strive for ongoing improvement of our and the clients QHHS performance.

Our consultants are highly educated and very experienced with offshore work and strive to ensure a safe and fitting work environment. The aim is zero accidents and we focus on prevention of stress related challenges.

We emphasize Hands on Management and put great efforts into meeting the client's requirements and expectations. We are the pioneers- and still in front!

Our QHSE system is in accordance with ISO 9001:2015, ISO 14001:2015 and OHSAS 18001:2008.

Our QHSE policy applies to all employees and consultants in Windandwater ApS and they are obliged to adhere to applicable laws and regulations and actively support the efficiency of our QHSE policy.

15. September 2017

Morten Milthers
CEO

Our QHSE policy is published on WindandWater's Web Page and posted on the Office wall. The policy may be handed to clients and business partners.

Quality Aim

It is the goal for Windandwater ApS to ensure the satisfaction of our clients never will require us to replace staff/Marine Coordinators.

Environmental- and work environment goals are described separately.
